

ASUS ROG Laser Gaming Mouse

Quick Start Guide

Connecting your Mouse

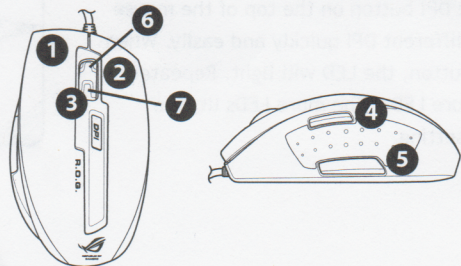

Once you have unpacked your mouse, connect it to a free USB port on your PC as shown.

Installing the Software

In order to set up and get the most out of your mouse, you must install the software on the supplied CD. Insert the CD into your CD-ROM drive and follow the on-screen instructions to install the software.

Customising your Mouse

Your mouse features five buttons, each of which can be assigned a specific function to best suit your needs. Once the software is successfully installed, click the mouse icon in the system tray to open the main screen

1	Select a function for each mouse button from the drop-down menus.
2	Select the polling rate from the drop-down menu.
3	Select the mouse DPI drop-down menu.
4	Drag the slider to select the double-click speed.
5	Test the double-click speed here.
6	Click to have your changes take effect without closing the screen.
7	Click to cancel any changes you have made.
8	Click to save your settings and close the screen.
9	Drag the slider to select the mouse sensitivity.
10	Click to save or load profile settings.
11	Click to select one of five possible profiles.

Using the DPI Button

You can use the DPI button on the top of the mouse to switch to a different DPI quickly and easily. When you press the button, the LED will light. Repeated presses light more LEDs. The more LEDs lit, the higher the DPI setting.
